SUMMARY

Motivated and detail-oriented Higher National Diploma (HND) student in Information Technology with a strong passion for Software Engineering. Skilled in designing, developing, and debugging web applications using modern technologies such as Java, JavaScript, HTML, CSS, and Laravel. Currently gaining hands-on experience with collaborative tools like Git, VS Code, and project management platforms like JIRA. Eager to contribute to building efficient, scalable software solutions in a real-world development environment. A fast learner and team player committed to writing clean code, continuous improvement, and delivering impactful solutions.

EDUCATION

Higher National Diploma In Information Technology — **2023 - Present**
ATI Tangalle.

Certificate in English — **2022**
National Youth Service Council (Godigamuwa, Tangalle)

Certificate In Human Resource Management
Open University (Ambalantota)

G.C.E (O/L and A/L)
H/ Ruhunu Vijayaba National College

TECHNICAL SKILLS

Testing: Manual Testing, Test Case Design
Tools: JIRA, Selenium (basic), Postman
Languages: Java / JavaScript
Technology : HTML/CSS/LARAVEL Framework
IDE : VSCODE/NetBeans

OTHER SKILLS

MS Office
Photoshop

LANGUAGE SKILLS

English (Intermediate)
Sinhala

PROJECTS / ACADEMIC WORK

Wedding Package Booking and Invoice System
Technologies: Laravel, MySQL, HTML, CSS, jQuery
QA Tools: Manual Testing, Postman, Selenium , Browser DevTools

Project Description:
Developed a web-based system to manage customer bookings for wedding packages. The platform supports user sign-up/sign-in, creation and updating of bookings, customer and package management, and real-time synchronization with both the system and Google Calendar, with automated notifications. Bookings include invoicing and payment settlement features, and administrative reporting capabilities.

Key Contributions:

- Developed responsive front-end interfaces using HTML, CSS, and jQuery, ensuring compatibility across devices and browsers.

- Implemented server-side logic with Laravel and MySQL to handle user data, booking flows, and real-time calendar integration.
- Integrated Google Calendar API to sync booking events and send real-time updates to users.
- Followed clean coding practices and modular design for maintainability and scalability.
- Used Postman for API testing and browser dev tools for responsive and cross-browser testing.
- Performed manual testing and debugging to ensure feature reliability and data integrity.
- Collaborated in an agile workflow, including code reviews, feature planning, and bug fixes.

Tour Package Booking Web Application
Technologies: Laravel, MySQL, HTML, CSS, jQuery
QA Tools: Manual Testing, Postman, Selenium , Browser DevTools

Project Description:
Designed and developed a web-based tour package booking system that allows users to browse, book, and manage tour packages online. Core features include secure user registration and login, package management, real-time booking updates, Google Calendar integration with automated notifications, invoice generation, and admin dashboards for reporting and analytics.

Key Contributions:
- Developed dynamic, responsive web pages using HTML, CSS, and jQuery, ensuring a smooth user experience across devices and browsers.
- Built and maintained backend functionality using Laravel and MySQL for booking workflows, customer data, and package handling.
- Integrated Google Calendar API to sync tour bookings and automate reminders.
- Implemented invoice and payment features, and created admin views for managing bookings and generating reports.
- Followed MVC architecture and clean coding practices for scalability and maintainability.
- Conducted functional and usability testing using manual test cases.
- Used Postman to test API endpoints and verify correct data flow and error handling.
- Performed basic automation testing with Selenium and ensured cross-browser compatibility using browser dev tools.
- Actively participated in debugging, issue tracking (Excel), and collaborating with team members to implement fixes.
